## The new 13-inch MacBook.

### Intel Core 2 Duo processor

Powered by the latest Intel Core 2 Duo processor at speeds up to 2.4GHz, the new MacBook is the fastest ever.

### More memory standard

The 2.4GHz MacBook models now include 2GB of memory standard — perfect for running more of your favorite applications smoothly.

### Larger hard drive

Every MacBook has a larger hard drive, up to 250GB, to store growing media collections and valuable data.

### Precision aluminum unibody enclosure

The new 13-inch MacBook is machined from a solid piece of aluminum, which not only looks stunning, it's also thinner, lighter, greener, and more powerful than ever.

### LED-backlit display

The ultrathin 1280-by-800-pixel LED-backlit display on the new MacBook shows off your digital media perfectly. The gorgeous glass and aluminum enclosure is arsenic- and mercury-free, and LED technology makes it more power efficient.
