

MacBook Pro

www.aiscomputers.com

Introducing the new 15-inch MacBook Pro.

Precision aluminum unibody enclosure

Machined from a single piece of aluminum, the new 15-inch MacBook Pro is sleeker, thinner, and years ahead of its time.

Multi-Touch trackpad

This trackpad has no button: It is the button. With a smooth glass surface, this spacious trackpad brings even more Multi-Touch gestures and functionality to the 15-inch MacBook Pro.

LED-backlit displays

The new MacBook Pro features an ultrathin 15-inch LED-backlit display that is uniformly bright and brilliant from the moment you turn it on. It's completely arsenic- and mercury-free and more power efficient than ever.

Advanced NVIDIA graphics processors

Get the most out of graphics-intensive applications like Aperture and Motion. The MacBook Pro features both the NVIDIA 9400M integrated graphics processor and a high-performance NVIDIA 9600M GT discrete graphics processor.

Designed for life on the road

Innovations such as the MagSafe power connection and an illuminated keyboard with ambient light sensor put the MacBook Pro in a class by itself.
